

PARIKSHA MITRA

Complete Page-by-Page Development Prompt Document

National Free Competitive Exam Coaching Platform

Version 1.0 | August 2026 | Confidential – Ministry of Education, Government of India

1. Master Prompt (Global Context for All Pages)

Use the following as the system-level context for every page development task (AI code generation, design tools, or human developers):

You are building pages for “Pariksha Mitra” – a national free competitive exam coaching platform of the Ministry of Education, Government of India.

Core principles that MUST be followed on every page:

- Free for all students
- Works on low-end Android phones (■4,000, 512MB RAM)
- Supports 2G networks and offline mode
- Fully vernacular (Hindi + English + 12–15 Indian languages)
- Aadhaar-based authentication
- Data residency only on NIC MeghRaj (India Cloud)
- CERT-In, DPDP Act 2023 and NeSDA compliant
- Accessible, simple UI, high contrast, large touch targets
- No dark patterns, no upselling, no premium locks
- Government branding (clean, trustworthy, national look)
- Performance first: fast load even on slow networks
- Inclusive: support for feature phones via SMS and DD Free Dish TV

Target users: (1) Students preparing for SSC, Banking, Railway, UPSC, NEET, JEE, State PSCs (2) Ministry of Education / Government administrators.

Always design mobile-first, then adapt to web/PWA and large screens.

2. Student / User-Facing Pages – Development Prompts

Page 01: Landing / Splash & Onboarding

Design and develop the Landing + Onboarding flow. Clean government-style splash with Pariksha Mitra logo and tagline “Every Student’s Personal AI Coaching Partner”. 3–4 simple onboarding screens. Language selection. CTA “Start Free Learning”. Extremely lightweight (under 300KB first load). Support Android app + PWA.

Page 02: Registration / Login (Aadhaar OTP)

Build secure Aadhaar-based authentication. Aadhaar number + OTP via UIDAI. Clear privacy notice. After login redirect first-time users to Diagnostic Assessment, returning users to Dashboard. Fully Aadhaar Act & DPDP compliant. Works on slow networks.

Page 03: Diagnostic Assessment (Day-1 Test)

Create 20-question AI Diagnostic Assessment. Adaptive test mapping strengths/weaknesses. Clean question UI with progress bar. Instant “Weakness Map” + auto-generated 30-day personalised study plan. Mobile-first and offline-capable.

Page 04: Student Home / Dashboard

Build main Student Dashboard. Personal greeting, streak, today’s goal. Cards for Continue Learning, Live Classes, Practice, AI Doubt Solver, Mentorship. Progress overview. Bottom navigation: Home | Learn | Live | Practice | Profile. Offline indicator.

Page 05: Smart Video Player & Library

Develop Video Library + Smart Player. Browse by Exam → Subject → Chapter. Player features: auto-chapters, 12-language subtitles, speed control, low-bandwidth mode, offline download (max 5/day), in-video Doubt button. Resume support. Optimised for low-end devices and 2G.

Page 06: Live Interactive Classes

Build Live Classes experience. Daily timetable. Live room with raise hand, polls, Q&A; queue, chat. Support 10–20 lakh concurrent viewers (HLS + WebRTC). Auto-recording. “Join via SMS” for feature phones. Low-latency and ultra-low 2G modes.

Page 07: Practice Engine & Mock Tests

Create Practice and Mock Test module. Topic-wise practice, PYQs, full-length mocks. Real exam-like interface. Detailed solutions + analytics. AI weak-area sets. Rank prediction. Offline practice packs.

Page 08: AI Doubt Solver

Develop AI Doubt Solver. Chat interface supporting text, image (photo of question), and voice. Answers in Hindi & English. Step-by-step explanations. Context from current video. Save to notebook. Human mentor fallback. Hosted on Indian servers.

Page 09: Gamification & Leaderboards

Build Gamification pages. Daily streaks, XP, badges. District / State / National leaderboards (privacy-respecting). Battle mode. Weekly challenges. Lightweight positive animations.

Page 10: Mentorship Network

Create Mentorship booking & session pages. Browse verified mentors (IAS toppers, experts, retired officers). Filter by exam/subject/language. Book 30-min slots. In-app call/chat. Feedback system. Free quota to keep accessible.

Page 11: Profile, Settings & Downloads

Develop Profile & Settings. Edit profile, language, notifications. Download manager with storage usage. Linked devices, logout. Data download / account deletion (DPDP). Help, privacy policy, terms.

Page 12: Notifications & Reminders

Build notification centre. Class reminders, study nudges, streak protection, result alerts. Rich notifications for low-end Android. In-app centre with filters. SMS fallback for critical alerts.

3. Government / Ministry-Facing Pages – Development Prompts

Page G01: Ministry Login & Role-Based Access

Create secure Ministry admin login. Government email / NIC auth or Aadhaar + OTP. Role-based access (National Admin, State Admin, District Viewer, Content Moderator, Report Viewer). Full audit logging.

Page G02: National Real-time Dashboard

Build main Ministry Dashboard. India map with real-time active users by state/district. Key metrics: Registered, DAU, Live Viewers, Videos Watched, Mock Tests, Estimated Family Savings. Filters by exam/date/state. One-click PDF/Excel export for Parliament. Auto-refresh.

Page G03: State & District Deep-Dive

Develop state and district analytics. Drill-down from national map. Local rankings, participation rates, heatmaps of engagement and drop-off. Comparison with national average.

Page G04: Content & Live Class Management

Create CMS for government team. Upload/approve videos, notes, mocks. Schedule live classes. Multi-language versioning. Quality checklist and approval workflow. Version history.

Page G05: Parliamentary & Impact Report Generator

Build one-click Parliamentary Report generator. Select period. Auto-generate PDF with growth, coverage, engagement, estimated savings, success indicators. Official letterhead. Download and email.

Page G06: User Support & Grievance Dashboard

Develop grievance monitoring. View tickets, AI vs human resolution rates. Flag systemic issues. Escalation matrix.

Page G07: System Health & Security Monitoring

Create technical operations dashboard. Real-time uptime, error rates, concurrent users, CDN performance. Security alerts, CERT-In status, data residency confirmation, capacity graphs.

4. Cross-Cutting Technical Prompts (Apply to All Pages)

Performance: Every page must show meaningful content in under 3 seconds on 2G. Aggressive code splitting, compression, lazy loading, offline-first with service workers.

Accessibility: WCAG 2.1 AA. Large touch targets (min 48×48 dp), high contrast, screen-reader support, full keyboard navigation on web.

Security: Token-based auth, input sanitisation, rate limiting. All data and compute only on NIC MeghRaj. No third-party trackers.

Offline: Critical paths (downloaded videos, practice, study plan) must work fully offline and sync when network returns.

5. Suggested Development Order (Phased)

Phase 1 (Months 1–3): Landing + Aadhaar Login, Diagnostic Assessment, Student Dashboard, Video Library & Player (SSC + Banking), Basic Practice Engine.

Phase 2 (Months 4–6): Live Classes, Gamification, Multi-language expansion, AI Doubt Solver (Hindi).

Phase 3 (Months 7–9): Mentorship, Full exam coverage, Ministry National Dashboard, Parliamentary Report Generator.

Phase 4 (Months 10–12): All 36 states optimised, 14–15 languages complete, Advanced analytics & impact reports.

6. Final Notes for Developers & Designers

- Always prioritise the student on a ₹4,000 phone in a village with 2G connectivity.
- Every screen should feel trustworthy, calm, and clearly government-owned.
- Gamification must remain positive and encouraging — never create anxiety.
- All user-facing copy must be available in simple Hindi and English at minimum.
- Document every API contract and data model carefully for future Ministry handover.
